The Best Red Peony, FELIX CROUSSE

STANDARD VARIETIES IN PEONIES

These varieties vary more than the Officinalis type in their blooming list, and are offered at a price much less than the novelties, and within the

GOLDEN HARVEST—Large, full, delicate flowers of creamy-yellow. This variety is grown largely for cut flowers, and on account of its strong growth, places it practically first among these varieties with yellow shadings.

QUEEN VICTORIA—Large, full, compact bloom opening flesh, changing to pure white, center petals tipped with carmine spots, a grand variety for any purpose.

season, and are selected as a few varieties of special merit from a large reach of all.

HUMEI CARNEA—Deep pink; strong grower; large, very full, highly cinnamon-scented flowers; graceful habit. Grown largely for cut flowers.

MEISSONIER—Brilliant amaranthine-crimson, broad petals, very large and full, an extra fine red.

ACHILLE—Floriferous, light flesh-pink, changing to blush-white, with an occasional creamy spot.

Beautiful Double Herbaceous Peonies

The wonderful improvements made during recent years in these old-fashioned hardy plants have made them immensely popular. After they are once planted, they require little attention and care, thriving almost anywhere, and are absolutely hardy everywhere, requiring no protection whatever, even in the most severe climate. They do best in good, rich soil and an open, sunny position, but this is not absolutely necessary. They like a liberal supply of water during their growing season. The abundance and wealth of the gorgeous flowers which they produce are sufficient to satisfy the most enthusiastic, their flowers rivaling the finest Roses in size, form and coloring. They are not troubled with insect pests or diseases of any kind, and, once planted, they take care of themselves, increasing in beauty each year. We offer herewith some of the newest and most beautiful varieties in cultivation.

IMPORTANT NOTICE—Peonies should be planted in the early fall. While Peonies can be and are planted at all times through the fall and spring months, there is no question about fall being the best time for setting out the roots. If planted out during the months of September and October, or even November, the result will be good blooming plants the following June.

The Old-Fashioned Peonies of Our Grandmothers' Gardens

These three varieties represent the best in free, early flowering and reliable kinds.

OFFICINALIS ROSEA—(Illustrated on front of cover.) Deep cerise pink; very striking. Price, 25 cents each.

OFFICINALIS ALBA—Pure white; large and full flower. Very popular for cemetery planting. Price, 25 cents each.

OFFICINALIS RUBRA—Deep crimson; excellent for early cut flowers. Very effective. Price, 25 cents each.

The above three Peonies in strong plants (if planted by November, will flower next spring) for 60 cents, postpaid.

Price, 40 cents each; the set of Five for \$1.65 postpaid

The Best Novelties in Colors—Crimson, White, Bright Pink and Light Shell Pink

ALL EARLY-FLOWERING. IF YOU WANT THE BEST, HERE THEY ARE

The following four varieties we offer as the best grown in the different colors and are not to be excelled by any other kinds in the Peony family. Apparently they are expensive, but the superior quality of these four named kinds over other standard varieties of this popular plant is greater than the difference in quality in any other family of flowers.

FESTIVA MAXIMA—This is not only the finest white in existence, but, in most quarters, is regarded as the queen of all the Peonies. Mr. Harrison says: "This flower has reached the ultimate, beyond which we cannot go." It combines enormous size with wondrous beauty, often 7 to 8 inches in diameter; color snow-white, flecked with an occasional clear purple spot on the edge of center petals; in addition it is very fragrant. Price, 50 cents each.

GIGANTEA—This is one of the rarest and most sought after in cultivation. The finest of all Peonies for cut flowers purposes. It is one of the earliest to bloom, produces an enormous flower 6 to 7 inches in diameter, on long stems; deliciously fragrant. Price, \$1.25 each.

FELIX CROUSSE—All Peony enthusiasts are familiar with the fact that it is difficult to get a red Peony that is a self-color—that is, a full, rich, even shade of red without being suffused with a shade of another color. Felix Crousse fills the bill. A rich, even, brilliant ruby-red, exceptionally fiery, bright and effective; very large, full bell-shaped bloom. Unique in color. Price, 75 cents each.

MARIE STUART—Large bloom, coming in clusters; outer petals soft pink, center pink and sulphur-white; very chaste bloom. Pleases everybody. Price, 50 cents each.

SPECIAL OFFER!

One each of the best of Novelties, Felix Crousse, Festiva Maxima, Gigantea and Marie Stuart (\$3.10 value), for \$2.80. One of our best offers.

SPECIAL OFFER! One each of the Peonies on this page for \$4.75. Peonies should be sent by express, as stronger roots can be sent in this way.

OUR COVER ILLUSTRATIONS

McGregor's Improved Fringed Primroses

As illustrated in color on front of cover.

THERE are many species and varieties of Primulas, all of them charming free-flowering plants, and most of them extensively cultivated. Perhaps the prettiest, as also the best known type, is the Chinese Primrose, one of the best house plants in existence. All of its numerous varieties furnish beautiful material for pot culture and most tractable and reliable plants for indoor treatment. The same may be said of Primula Obconica, a variety of later introduction. Its heads of finely formed flowers, ranging in color from the purest white to deepest carmine, are produced in great numbers and under the easiest of culture. Another superb variety for house culture is Primula Forbesii or the Baby Primrose, a very dwarf, unique sort, but the freest flowering of all Primulas, sending up countless tiny flower spikes all through the winter months. All the varieties named above are not hardy, and are chiefly grown in and for the conservatory, greenhouse and dwelling room. The improved strain of fringed Primroses which we have illustrated in colors, are the largest flowering and most striking that have yet been produced, and we have no hesitancy in recommending them highly.

SUTTON'S DUTCHESS—Beautiful pure white with yellow eye.
ORANGE KING—Color, rich orange-salmon shaded terra cotta.
MT. BLANC—Pure white flowers; heavy green foliage.

DUTCHESS RED—Rich fiery-red with deeper crimson zone.
CHESWICK RED—Rich deep rose; a fine flower.
KERMESINE—Bright carmine with yellow eye; fine.

Price, 15 cents each, any three for 30 cents, or the full set of six for 50 cents, postpaid.

Price for larger plants for immediate flowering, 25 cents each; any three for 60 cents; the set of six for \$1.00.

NOTE—The Star Primroses we offered last season, the strain of which had been much heralded by the English producers, failed to come up to our expectations. While showing good tints of color we are afraid the strain will not prove as satisfactory as other introductions.

THE BABY PRIMROSE

(Primula Forbesii)

Wonderfully free-flowering plant, to flower as soon as borne. Flowers of a delicate rosy-lilac, with eye of pale gold; produced in great abundance. Price, 10 cents each, three for 25 cents.

Ever-blooming Primula Obconica

OBCONICA GRANDIFLORA—Flowers pure white.

OBCONICA CARMINEA—Color deep cerise-pink.

Price, nice plants of either variety, 15 cents each; two for 25 cents; \$1.25 per dozen, postpaid. Large plants, either variety, 25 cents each; two for 40 cents; \$2.00 per dozen.

Five Best STANDARD PRIMROSES

PRIMROSE ALBA—Flowers pure white, the foliage green.

PRIMROSE RUBRA—Purplish-red, white eye.

KELMESINA SPLENDENS—Bright carmine, yellow eye.

COCCINEA—Bright red, large flowers, beautifully fringed.

STRIATA—Flowers white, striped and blotched purple-red.

Price, any variety, nice plants, 10 cents each, the five for 40 cents.

McGregor's Improved WINTER=FLOWERING GERANIUMS

As illustrated in color on back of cover.

RADIANCE—Flowers of dark soft red, tinted with scarlet and heavily shaded with maroon; very dark and rich and at the same time very bright; a beautiful variety.

WHITE PERFECTION—A pure white variety as free flowering as the single varieties; an excellent one for winter pot culture.

PINK BEAUTY—Extra fine large bold flowers of a beautiful silvery-pink. A grand blooming sort and of great merit.

APRICOT—A variety with beautiful rosy-salmon flowers shaded with apricot one of the best; flowers of immense size and excellent shape.

SENSATION—Another magnificent variety; trusses of enormous size, beautiful carmobe-violet color; shaded rich violet, exceedingly free blooming.

FIREFLAME—Color dazzling scarlet, fine prominent truss.

Price, 15 cents each, any 3 for 30 cents, or the full set of 6 varieties illustrated in color for 50 cents, postpaid.

The New "Christmas" Collection

15 LARGE BULBS SENT POSTPAID FOR 50 CENTS.

After careful testing, consultation with our Holland bulb growers, and painstaking study, we have succeeded in forming a collection of winter-flowering bulbs which can easily be brought into bloom at Christmas time by any amateur. This collection will give you a window garden full of brilliant, fragrant and delicate flowers for several weeks. Buy the bulbs early in the fall, and plant them at once in pots or boxes. Water them abundantly immediately after planting, cover the tops of the pots with leaves or excelsior, and place in a dark closet or cellar for four or five weeks, until the roots are well grown. Bring them out to a sunny window three or four weeks before the blooms are desired, as the tops will grow strong and rapidly after the roots are well grown.

Select Named Single Hyacinths

PRICE, YOUR SELECTION, 10 CENTS EACH

Single Hyacinths are much to be preferred to double ones. In the double Hyacinth, whereas the single florets are doubled, they are much farther apart on the stem, and therefore do not form nearly so handsome a truss as the single varieties where the trusses are much longer and fuller. We strongly advise the single instead of the double for both bedding and pot culture.

EARLY TULIPS

Tulips are the most satisfactory of spring-flowering bulbs. They are extremely hardy and of easy culture, blooming as freely and producing as fine flowers in a confined town garden as in a more favored place. Double and Single Tulips, when associated together and planted in front of shrubs, maintain a longer display than if either are separately planted. One of the prettiest ways to plant them is in the sod next the foundation of the house, where they will come up and bloom year after year with no care.

HARDY GARDEN LILIES

SPECIAL NOTICE

Many of the finest Lily bulbs come from Japan, and are not received in this country until November. They cannot be obtained earlier, as the bulbs are not shipped until fully matured. Where bulbs are offered for sale earlier than the latter part of November, they are bulbs which have been kept in cold storage, and thereby have lost much of their vitality, and will not grow as well as fresh bulbs. Therefore, we advise the preparation of the Lily beds or borders early in autumn, covering them with four to six inches of leaves or litter of any kind. This will keep them open, and admit of the planting of the bulbs even if not received until December.

DECORATIVE FERNS

These beautiful plants for home decoration vie with the Rubber plants for first place in the esteem of flower lovers. They are finely cut and oddly shaped. Fronds have a graceful effect produced by few other plants and they do exceedingly well in the parlor and conservatory. The Ferns of the Pteris family, which are best for the house, do as well as the Sword Ferns. The Nephrolepis family, of which the well-known Boston is a member, has furnished us many beautiful species of late years. We recommend all the varieties listed for indoor growing or for fern-eries for table decoration. Ferns should be planted in a good light soil with some sand and leaf mold added, give good drainage.

Nephrolepis Exaltata Bostoniensis (The Boston Fern)

This popular Fern has proved one of the best decorative plants of recent introduction. The fronds are much larger than the Sword Fern, and do not stand so stiff, but droop gracefully. Excellent for making large specimen plants, also for hanging baskets. Price, nice young plants, 10c each; larger plants, 25c and 50c each.

Nephrolepis Scottii

It is a condensed form of the Boston Fern, with characteristics not evident in the parent, an average plant in an eight-inch pot having 200 fronds. The fronds average about twenty inches in length and three inches in width at the widest point, being more finished than the parent. Price, nice young plants, 15 cents each; larger size, 25 and 50 cents.

The Plumed Scottii Fern (Nephrolepis Scholzei)

The ideal plumed Fern, holding the same position to all other plumed varieties that Scottii holds to the old Boston. It is a sport from Scottii possessing all the merits of that most popular variety, but with the pinnae subdivided, giving it an airy, feathery appearance. Price, nicely shaped plants, 50 cents each.

The Springfield Fern

Offered for the first time. A valuable Fern, especially for vases, baskets, and box work; of very erect growth, the fronds more stiff than the Boston, and similar to the Piersonii Fern. It is a vigorous growing variety and we believe will prove very popular. Price, nice young plants, 15 cents each; strong plants, 35 and 50 cents.

Nephrolepis Piersoni

(Ostrich Plume)

An entirely new form of Boston Fern. The pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two, or even three, were condensed in one. They are graceful, feathery, plumed, nothing describes them better than "Ostrich Plumes." Price, nice young plants, 15 cents each; larger plants, 25 and 50 cents.

Nephrolepis Piersoni Elegan-tissima or Tarrytown

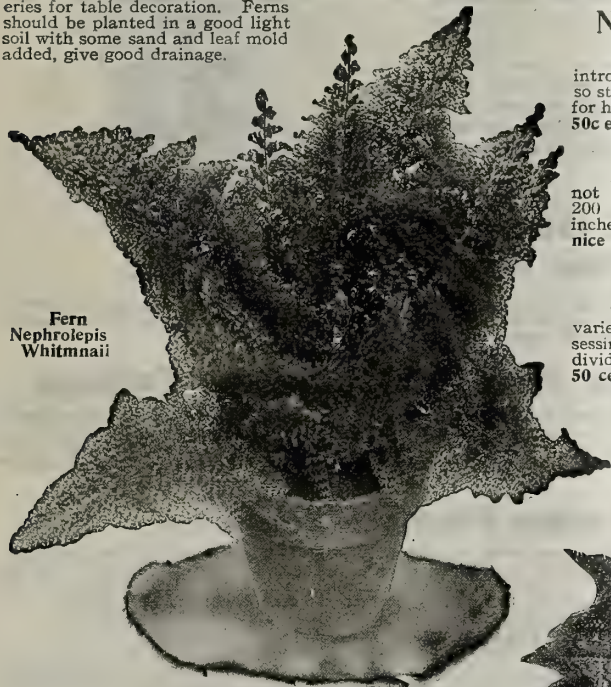

This is a sport from the Piersoni Fern; the plant is of much more compact habit, one-half as tall, but with the fronds nearly twice as wide, making it a much more desirable plant for all purposes. Price, nice young plants, 15 cents each; larger plants, 25 and 50c each, postpaid.

Nephrolepis Superbissima

The latest improvement in this family of Ferns, unique in foliage, quite different from all other varieties of this family, standing in a class by itself. It makes a dwarf, compact growth similar to the Scottii Fern, the fronds, however, being more dense, firm and rigid, and the foliage several shades darker than any other Fern coming from the Boston type. Price, nice young plants, 35 cents each; strong plants in 4-inch pots, well established, 75 cents each.

SPECIAL OFFER

Your selection of Ferns from this page, excepting Hardy Ferns, to the value of \$1.25 for 95cts., postpaid.

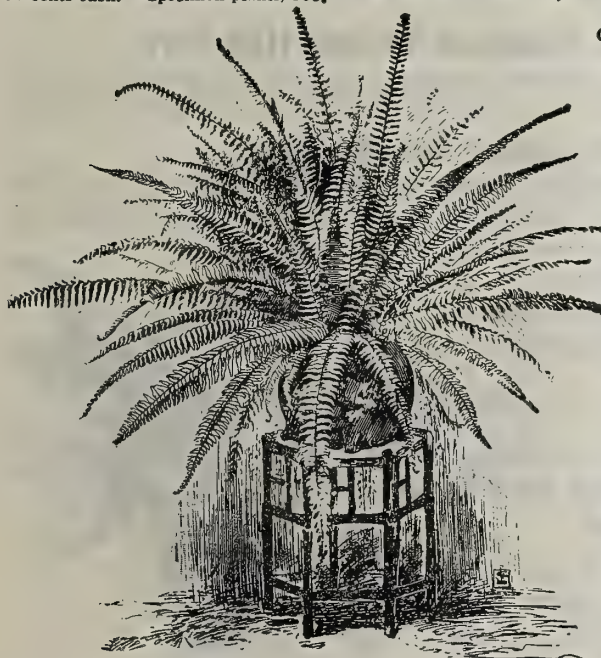

Fern
Nephrolepis
Whitmanii

Nephrolepis Whitmanii

The best of the Crested Ferns and a great favorite. (See cut.) Delights in hot weather and is perfectly at home here in the summer. Whitmanii is of dwarfier growth, but equalizes matters by compactness and a wider, stockier shape. Price, nice young plants, 15 cents each; larger plants, 25 and 50 cents each. Specimen plants, 75c.

Asparagus Plumosa

(CLIMBING LACE FERN)

An exceedingly beautiful plant for Fern dishes, the house and conservatory, and will thrive nicely in the temperature of an ordinary living room. Entirely unequaled for the grace and beauty of its lovely, spray-like fronds. Price, nice, thrifty plants, 15 and 20 cents each; \$1.50 and \$2.00 per dozen, postpaid; larger size, 25 cents each; \$3.00 per dozen, by express.

Pteris Adiantoides

The Beautiful Maiden Hair Fern

A very beautiful form of *A. Cuneatum*, having long, graceful fronds, with the ends of the fronds developed into bunching, tasseled heads; a distinct and lovely variety. Price, 10 cents each; \$1.00 per dozen; larger size, 25 cents each. (See cut)

The Beautiful Moss Fern, Selaginella Emilliana

A new, upright-growing moss, with numerous feathery stems branching from the base and forming a dense tuft. Well grown plants attain twelve to eighteen inches in height. We know of no moss superior to it. We put this moss in with the page of Ferns as the character is very much like the Ferns and is used with them in Ferneries. Price, 10 cents each; \$1.00 per dozen; larger size, 25 cents each.

Selaginella Emilliana

Cyrtomium Falcatum (Holly Fern)

We consider this one of the finest Ferns in cultivation to grow into specimen plants, and while it is coarser than the Tremula Fern, yet it is very graceful and is becoming very popular. The leaf is a rich, glossy green, and each leaflet is about the shape and size of a Rose leaf. The fronds are fine for cutting, on account of their lasting quality. Price, 15 cents each; \$1.50 per dozen.

Pteris Adiantoides

A very desirable Fern, whether for growing in the room or planting out. Very similar to Falcatum, having the same deep green leaf. Grows very freely and attains a height of 12 to 18 inches. Price, 15 cents each; larger size, 25 cents each.

Pteris Wimsetti (Crested Fern)

A very pretty and useful Fern for specimen or dish. Green leaves with ends very peculiarly crested. This Fern is not generally known. It is one of our best varieties for dishes, being a short, compact grower, and will stand rough treatment. Price, 15 cents each; \$1.00 per dozen; large, strong plants, 25 cents each.

Adiantum Venosum (Maiden Hair Fern)

A very beautiful form of *A. Cuneatum*, having long, graceful fronds, with the ends of the fronds developed into bunching, tasseled heads. Very similar to *Cuneatum Grandiceps*, only having a little larger leaf, and stronger grower. Price, 10 cents each; three for 25 cents; larger plants, 25 cents each.

Cyrtomium Falcatum

Aspidium Tsussimense

Without question the most valuable of all Ferns yet introduced for Fern dishes; of strong but dwarf and graceful habit; of good color and of better keeping quality than any other Fern we know. A clear, good grower, and very ornamental. Price, 10 cents each; \$1.00 per dozen; larger size, 25 cents each.

Pteris Wimsetti

Pteris Cretica Mayii

New Emerald Feather Asparagus

(*Asparagus Sprengerii*)

This is undoubtedly one of the handsomest and most valuable evergreen trailing plants for the house and conservatory ever introduced. It is especially valuable for Fern dishes, pots, vases, baskets, etc. Price, 15, 20 and 25 cents each; \$1.50, \$2.00 and \$2.50 per dozen, postpaid.

Pteris Victoria

A very pretty variegated-leaved variety; compact, strong grower and one of the best for Fern dishes. Price, 15 cents each; \$1.50 per dozen.

Pteris Tremula

Pteris Tremula

(Shaking Fern.) The foliage of the *Pteris* varieties is large, very graceful. The slightest movement of the air shakes the leaves of this kind, which we recommend more than any other for house culture, etc. It grows readily and very fast. Keep the leaves from dust and sprinkle slightly every warm day. Price, 10 cents each; \$1.00 per dozen; larger size, 25 cents each.

Onychium Japonicum

A very beautiful Fern, having long, graceful fronds. The wiry texture of the leaf makes it keep for a long time, very useful to cut for vases, etc. Price, 10 cents each; \$1.00 per dozen.

The Beautiful Silver Fern, *Pteris Argyrea*

A very showy Fern with variegated foliage; fronds large, light green, with broad band of silver-white down the center of each. Very distinct. We have a large stock of this beautiful Fern. Price, 20 cents each; \$1.50 per dozen; larger size, 30 cents each.

Pteris Cretica Albo-Lineata

A pretty and useful variegated variety, distinctly showing the clear white variegation. A useful and easily grown Fern. Price, 10 cents each; \$1.00 per dozen; two for 25 cents.
